Authors

Maggie Woods, Deputy Director of Leadership and OD, NHS Thames Valley and Wessex Leadership Academy

Jane Hazelgrove, AD for Professional Development, HEE Wessex and **Jane Siddall**, AD for Educator and Faculty Development, HEE TV

At present the toolkit is available in this document with live hyperlinks. It will be uploaded onto a website very soon.

We would like to thank Jo Szram from the London Deanery for contributions and support.

Introduction

Healthcare delivery is now the responsibility of all individuals working collaboratively within complex systems that cross disciplinary and organisational boundaries. Effective clinicians need to be able to work within and with these systems in order to deliver high quality effective care for patients and patient populations. In order to develop these skills, clinicians need to be exposed to a variety of learning opportunities within the domain of management and leadership.

There is growing evidence that supports a strong relationship between the engagement of clinicians in the leadership task and a range of healthcare quality and outcomes. West M et al 2015

On completion of training all doctors find that part of their work includes a leadership and management role and for a small cohort it may well form a much larger role should they choose a career path of senior medical leadership. It should be acknowledged that leadership and management are not skills to be learnt in the closing months of postgraduate training, but to be developed during the entirety of training and beyond.

This toolkit is designed to help trainees to develop competencies to prepare them for life as a senior doctor. It supports the need for practical experience in leadership and management during training and seeks to put theory into practice. The toolkit is flexible, meaning it can be used in its entirety, or to complement existing leadership or management training programmes. It is designed not just to be a point reference but to come together as a portfolio of work over the course of a speciality training programme.

It is stressed that merely undertaking a leadership or management activity is no evidence of leadership competency development unless the trainee has thought about it/ reflected/ received feedback and they have linked behaviours to an established leadership framework, such as the Medical Leadership Competency Framework or the Healthcare Leadership Model. A reflective template is included at the end of this toolkit to facilitate the reflective process.

This toolkit is flexible, meaning that it could be used in its entirety, or to complement components of your training curriculum requirements, or existing leadership or management training programmes.

General Principles - What exactly is involved in using the toolkit

The toolkit is designed around both trainee and educational supervisor incorporating it into personal development plans. It can then be used year on year as the trainee progresses through the speciality programme, with the end result being a portfolio of activities and learning logs reflective of the trainee's personal journey through management and leadership.

The role of the trainee

- All trainees at entry into specialty training should carry out the leadership academy self-assessment tool which is part of the Managing yourself domain.
<https://www.leadershipacademy.nhs.uk/resources/healthcare-leadership-model/supporting-tools-resources/healthcare-leadership-model-self-assessment-tool/>
- Trainees are expected to complete a maximum of two projects per year, chosen from any of the domains. However, within each domain are useful links which should be used for self-directed learning. The projects form practical application of this knowledge.
- Trainees are not restricted to the projects suggested under each domain and encouraged to develop their own projects.
- Each of the first two years of training, trainees are strongly encouraged to choose one project from the Managing Yourself domain, alongside another project chosen from any of the other domains.
- All projects should be completed during the training year and mapped in line with the length of the trainee's placements.
- Upon completion of training, trainees should aim to have completed projects from each of the eight domains.
- Trainees are encouraged to refer to the healthcare leadership model dimensions when carrying out projects and reflect on the process of higher/strategic level thinking in relation to their activities.

The role of the supervisor

- At the start of each training year, supervisors will agree with their trainees which projects the trainee should undertake under which domains. This should be a joint decision and should take into account current opportunities within the organisation
- The supervisor role is key to ensuring that the projects chosen are appropriate to the trainee's level, and achievable given the time and resource available.
- Together the trainee and supervisor will develop a plan for completing each project; resources and signposting will be agreed, and progress will be reviewed regularly.
- Evidence of completion for the projects chosen will be uploaded to each trainee's ePortfolio for review at ARCP every year. The format of evidence provided will be at the discretion of the supervisor.
- A summary line of progress with the toolkit could be incorporated into the Educational supervisors final report for ARCP.
- Supervisors are not expected to manage any of the projects themselves but are meant to signpost trainees to the appropriate projects for them to complete independently.
- Trainers should note that a large number of the projects undertaken within the programme are practical and can be for the benefit of their department. In many cases trainees will be undertaking projects that can save them time e.g. by requesting a new piece of equipment on behalf of their department. Within your organisation, it may be useful for supervisors to come together and put on face to face workshops with trainees to help solidify learning and exposure with certain domains. Eg a face to face workshop around team working exploring individual roles
- For those trainees who demonstrate a natural flare or wish to take their learning in management and leadership further, trainers should discuss the options available in the 'taking it further section' at the end of the toolkit.

Similar to the principles of the Plan-Do-Check-Act cycle¹, for any project undertaken by trainees they are expected to plan, do, and then reflect in order to improve their leadership and management skills.

Tiered learning

The toolkit incorporates a tiered learning structure. With each level building on the one before and developing in level of challenge for the trainee. Other factors that might affect the type of activity or project chosen are the trainee's preferred learning style, experience or interest in a particular area.

For more information visit: <http://www.hse.gov.uk/managing/plan-do-check-act.htm>

Trainers and trainees are advised to start with an easier activity/ intervention or project. Trainees can choose activities, interventions and projects which increase in complexity as the trainee becomes more mature. If a trainee's level of competence allows them to undertake a more difficult intervention at the beginning of the year, it may be advisable for them to undertake an easier project in their next placement, to balance out the workload over the course of the year.

¹ For more information visit: <http://www.hse.gov.uk/managing/plan-do-check-act.htm>

Principles

The interventions / activities should be relevant, predominately work based, be multi professional and inclusive. Most of the interventions and resources identified in this framework are either online tools or resources, the aim being for trainees to access the resources either individually or in groups at a time convenient to them and then hold discussions and reflections with their educational supervisor/ trainer, either in the workplace or via tutorials. **The red text indicates what the stakeholders consider to be essential elements.**

Context

The interventions/ resources have been mapped to the NHS Health Care Leadership Model [here](#) and are in line with the Developing People Improving Care Framework [here](#) and the GMC Generic Professional Capabilities framework [here](#)

The toolkit is broken down into three continuous stages:

Early Years F2-CT/ST2
GP F1/2

Middle Years ST3-5
ST1-3

Later Years CT6 to 2 years post CCT
Post CCT

Learning to Lead Toolkit

Resources and training courses

The next few pages provide examples of activities or projects which can be undertaken at different stages in training. Supervisors and trainees may wish to use and tailor these examples, or develop their own activities or projects depending on the specialty. We would also encourage using resources available within individual trusts to support work place-based learning.

The Toolkit will be regularly updated, and new resources will be added as they become available. This blended approach to learning is centred on both self-assessed and peer and learning, as well as by discussion with educational supervisors.

At the end of the toolkit is a template reflection tool, designed for the trainee to be able to log a reflection on their activities through the year. By the end of the training programme, the toolkit will provide a summary of activities and reflection logs.

Accompanying Worksheets

Alongside this toolkit has been developed work sheets for trainees and educational supervisors to use. Based on the domains of the MLCF the worksheet are excellent tools to prompt learning

Learning to Lead

Educational Supervisor/ Trainee Discussion

Three questions that can be used to facilitate discussions

- Tell me about how your behaviour has developed with leadership in mind?
- What have you observed and learned from others in respect of leadership behaviours?
- What have people told you about your leadership behaviours - includes feedback from individuals and multisource feedback?

Leadership Worksheets

As discussed above, alongside this toolkit has been developed work sheets for trainees and educational supervisors to use. Based on the domains of the MLCF the worksheet are excellent tools to prompt learning. The work sheets can be found...

Reflective Log Template

The template on the next page allows space for the trainee to log a short summary and reflection of their activities in meeting the domains they chose over the course of each year.

Leadership Reflective Log

Name of Trainee

Level of Training:

Activity/ Intervention undertaken, or Projects completed:

Reflection:

What? (a description of the activity)

What happened, what did I do, what did others do, What did I feel, What was I trying to achieve?, what were the results, what was good or bad about the experience

So what? (An analysis of the event)

So what is the importance of this? So what more do I need to know about this?, so what have I learned about this?, so what does this really mean for me

Now What? (Proposes a way forwards following the event)

Now what could I do? Now what should I do? Now what would be the best thing to do? Now what will I do differently next time?

Adapted from Rolfe, G, Freshwater, D and Jasper, M (2001) Critical Reflection for Nursing and the helping professions, a user's guide. Basingstoke, Palgrave Macmillan AoMRC guidance on reflection:

Taking it further

The toolkit provides a framework for development of management and leadership skills within the day to day job of a doctor in postgraduate training. Beyond this there are opportunities for out of programme years and formal qualifications should a trainee wish to take the domain further

i)	<p>Source: Faculty of Medical Leadership and Management</p> <p>Description: The Faculty of Medical Leadership and Management (FMLM), established in 2011 by all the UK medical royal colleges and faculties and endorsed by the Academy of Medical Royal Colleges, is the UK professional home for medical leadership. Our primary objective is to raise the standard of patient care by improving medical leadership. They have courses, qualifications and fellowships on offer.</p> <p>Link: https://www.fmlm.ac.uk/</p>
ii)	<p>Source: Darzi Fellowships</p> <p>Description: The Darzi Fellowship Programme is a prestigious, high profile initiative that has been shown to have a profound impact not only on participants, but also on their employing organisation.</p> <p>Link: http://www.londonleadershipacademy.nhs.uk/</p>
iii)	<p>Source: NHS Leadership academy</p> <p>Description: The Edward Jenner programme is your first port of call if you're looking to build a strong foundation of leadership skills that can help enhance your confidence and competence in your role. Suggested Reading List for Leadership Development / Insights

No reading list is ever complete, and not all readers will be interested in all the titles suggested. The intention is to signpost you to some of the more useful publications in recent years, exploring leadership styles, examining how you might enhance your own leadership and personal effectiveness, human factors, strategies to enhance clinical safety and how your own mindset and attitudes could hinder your progress and success as a leader.

Many of these books can be downloaded as free audio titles, in addition to being available on e-readers and traditional format books. All were available to purchase May 2018.

Modern Leadership tools and theories

Leadership Plain and Simple

Steve Radcliffe

ISBN-10: 0273772414

ISBN-13: 978-0273772415

Described by *The Times* as the 'no-nonsense approach...shaking up the world of leadership', this book really does offer instantly-applicable advice. It contains no jargon or irrelevant theory, just practical insights, straightforward actions and simple guidelines to accelerate your growth as a leader.

Whether you need guidance to lead an organisation or team or just want to feel more confident and effective at work, this book will show you how.

Consiglieri: Leading from the Shadows

Richard Hytner

ISBN-10: 1781250464

ISBN-13: 978-1781250464

How to make friends, influence people and be the (second) best you can be - by being second-in-command. Hytner suggests it is time to celebrate the second-in-command, the consiglieri: Merlin to King Arthur, Al Gore to Bill Clinton, Rasputin to the Russian Royal Family. These are the deputies, Vice-Presidents, Chief Operating Officers, Chief Financial Officers, Department Heads etc. Supremacy comes with drawbacks (one of which is that everyone wants your job) and influence, authority and power can be found in much more interesting places than behind the CEO's desk. Consiglieri brings together historical examples from Thomas Cromwell to Cardinal Richelieu, conversations with the second-in-commands of Tony Blair and Sir Alex Ferguson, insights into Stalin, JFK, Winnie the Pooh and Eeyore, interviews with leaders in sport, business, politics and music and cutting-edge research from psychologists and academics to produce a fresh (and refreshing) approach to leadership in the mould of Obliquity or Thinking, Fast and Slow

The New Leaders: Transforming the Art of Leadership

Daniel Goleman, Richard Boyatzis & Annie McKee

ISBN-10: 0751533815

ISBN-13: 978-0751533811

Goleman argues that emotionally intelligent leaders are now 'must-haves' for business today. But many readers have been left with, so now what do I do? The New Leaders answers that question by laying out the map for transforming leadership in individuals, in teams and organisations. Goleman has taught at Harvard (where he received his PhD) and was formerly senior editor at Psychology Today. His previous books include Vital Lies, Simple Truths; The Meditative Mind; and as co-author, The Creative Spirit.

The 7 Habits of Highly Effective People

Stephen Covey

ISBN-10: 0684858398

ISBN-13: 978-0684858395

A holistic, integrated, principle-centred approach for solving personal and professional problems. With penetrating insights and pointed anecdotes, Covey reveals a step-by-step pathway for living with fairness, integrity, honesty and human dignity - principles that give us the security to adapt to change, and the wisdom and power to take advantage of the opportunities that change creates. The adaptive action framework introduces a simple, common sense process to guide organizations and people through uncertain times.

Adaptive Action: Leveraging Uncertainty in your organization

Glenda Eoyang & Royce Holladay

ISBN-10: 0804787115

ISBN-13: 9780804787116

What? So what? Now what? Three deceptively simple questions invite you and your organization to devise solutions and improve performance across multiple challenging situations.

Human Factors and Clinical Safety

Safer Healthcare: Strategies for the Real World

Charles Vincent & Rene Amalberti

ISBN-10: 3319255576

ISBN-13: 978-3319255576

The authors of this book set out a system of safety strategies and interventions for managing patient safety on a day-to-day basis and improving safety over the long term. These strategies are applicable at all levels of the healthcare system from the frontline to the regulation and governance of the system.

Complications: A Surgeon's Notes on an Imperfect Science

Atul Gawande

ISBN-10: 1846681324

ISBN-13: 978-1846681325

Gawande's first book is a series of essays on medical issues that arise in the life of a surgeon. There's some history of medicine, some looking towards the future, some powerful stories of the everyday life of a surgeon, and some thoughts on ethics (when should the doctor be paternalistic - for example, not wanting to take responsibility for complex decisions on the care of his own child,) the training of surgeons - obviously they need training but they aren't so good while they are practising.

The Checklist Manifesto

Atul Gawande

ISBN-10: 1846683149

ISBN-13: 978-1846683145

Avoidable failures are common, and the reason is simple: the volume and complexity of our knowledge has exceeded our ability to consistently deliver it - correctly, safely or efficiently. Gawande makes a compelling argument for the checklist, which he believes to be the most promising method available in surmounting failure. The checklist is an essential tool in virtually every area of our lives, and Gawande explains how breaking down complex, high pressure tasks into small steps can radically improve everything from airline safety to heart surgery survival rates.

Safety at the Sharp End: A Guide to Non-Technical Skills

Rhona Flin & Paul O'Connor

ISBN-10: 0754646009

ISBN-13: 978-0754646006

Safety at the Sharp End is a general guide to the theory and practice of non-technical skills for safety. It covers the identification, training and evaluation of non-technical skills and has been written for use by individuals who are studying or training these skills on Crew Resource Management (CRM) and other safety or human factors courses. The material is also suitable for undergraduate and post-experience students studying human factors or industrial safety programmes.

How our own minds function

Frazzled

Ruby Wax

ISBN-10: 024197206X

ISBN-13: 978-0241972069

Wax came to prominence as a comic interviewer, playing up to British perceptions of the strident American style, which she replicated in the TV sitcom *Girls on Top*. She also appeared in *Absolutely Fabulous*, where she doubled as script editor. Her memoirs, *How Do You Want Me?*, reached the Sunday Times best-seller list.

Wax pursued a distinguished academic career, graduating in psychology at the University of California, Berkeley and gaining a master's degree in mindfulness-based cognitive therapy from Oxford University. Wax is currently a Visiting Professor in Mental Health Nursing at the University of Surrey.

Thinking, Fast and Slow

Daniel Kahneman

ISBN-10: 0141033576

ISBN-13: 978-0141033570

Why is there more chance we'll believe something if it's in a bold type face? Why are judges more likely to deny parole before lunch? Why do we assume a good-looking person will be more competent? The answer lies in the two ways we make choices: fast, intuitive thinking, and slow, rational thinking. This book reveals how our minds are tripped up by error and prejudice (even when we think we are being logical), and gives you practical techniques for slower, smarter thinking. It will enable to you make better decisions at work, at home, and in everything you do.

The Secret Thoughts of Successful Women: Why Capable People Suffer from the Impostor Syndrome and How to Thrive in Spite of It

Valerie Young

ISBN-10: 0307452719

ISBN-13: 978-0307452719

This book provides important insights into the Impostor Experience of very competent women. The author provides important knowledge that can help women begin to truly appreciate and acclaim their success. A book that provides insight on how to overpower limiting thoughts and behaviours for any gender.
